Vendor-neutral · Practitioner-led · Mandate-aligned

Legal Cyber Security Maturity Assessment

Enterprise Platform Walkthrough

A sequential, screen-by-screen tour of the working system: from first landing through data capture, maturity scoring, compliance mapping, and sector benchmarking.

PREPARED FOR

Meridian Legal LLP

EXHIBIT

Prototype demonstration: full user journey

DATE

September 13, 2026

Operationalizing Executive Order 14028, OMB M-22-09, and CISA directives for law firms.

What This Exhibit Shows

Rather than a single static image, the pages that follow capture the entire user journey in sequence. Read together, they demonstrate a complete, working system: each screen is a real capture from the running platform.

ALL 8 DOMAINS · FULLY FIELDED

Note: Figures reflect a representative sample assessment for demonstration. Scores, benchmarks, and organization name are illustrative.

The practitioner-facing entry point frames the platform as a vendor-neutral framework operationalizing federal cybersecurity mandates (Executive Order 14028, OMB M-22-09, CISA directives) for the legal sector.

Assessment Overview & Scope

A user starts a guided evaluation spanning 8 IT and security domains across 5 maturity dimensions, with clear paths to complete the assessment, review results, and generate an improvement plan.

Assessment Tool

Legal IT Maturity Assessment

Evaluate your organization's IT maturity across key domains and dimensions

Complete Assessment

Answer questions about your IT practices

The assessment covers 8 domains and 5 dimensions of IT maturity. Answer questions about your current practices to receive a detailed maturity score.

8 key IT domains

5 maturity dimensions

Takes about 15-20 minutes

8 Domains

Key areas of IT operations

5 Dimensions

Aspects of each domain

How It Works

The assessment process is simple and straightforward

1

Complete the Assessment

Answer questions about your organization's IT practices across 8 domains and 5 dimensions.

2

Review Your Results

Get a detailed breakdown of your maturity scores with visualizations and benchmark comparisons.

3

Plan Improvements

Use the insights to develop a targeted improvement plan for your organization's IT maturity.

5

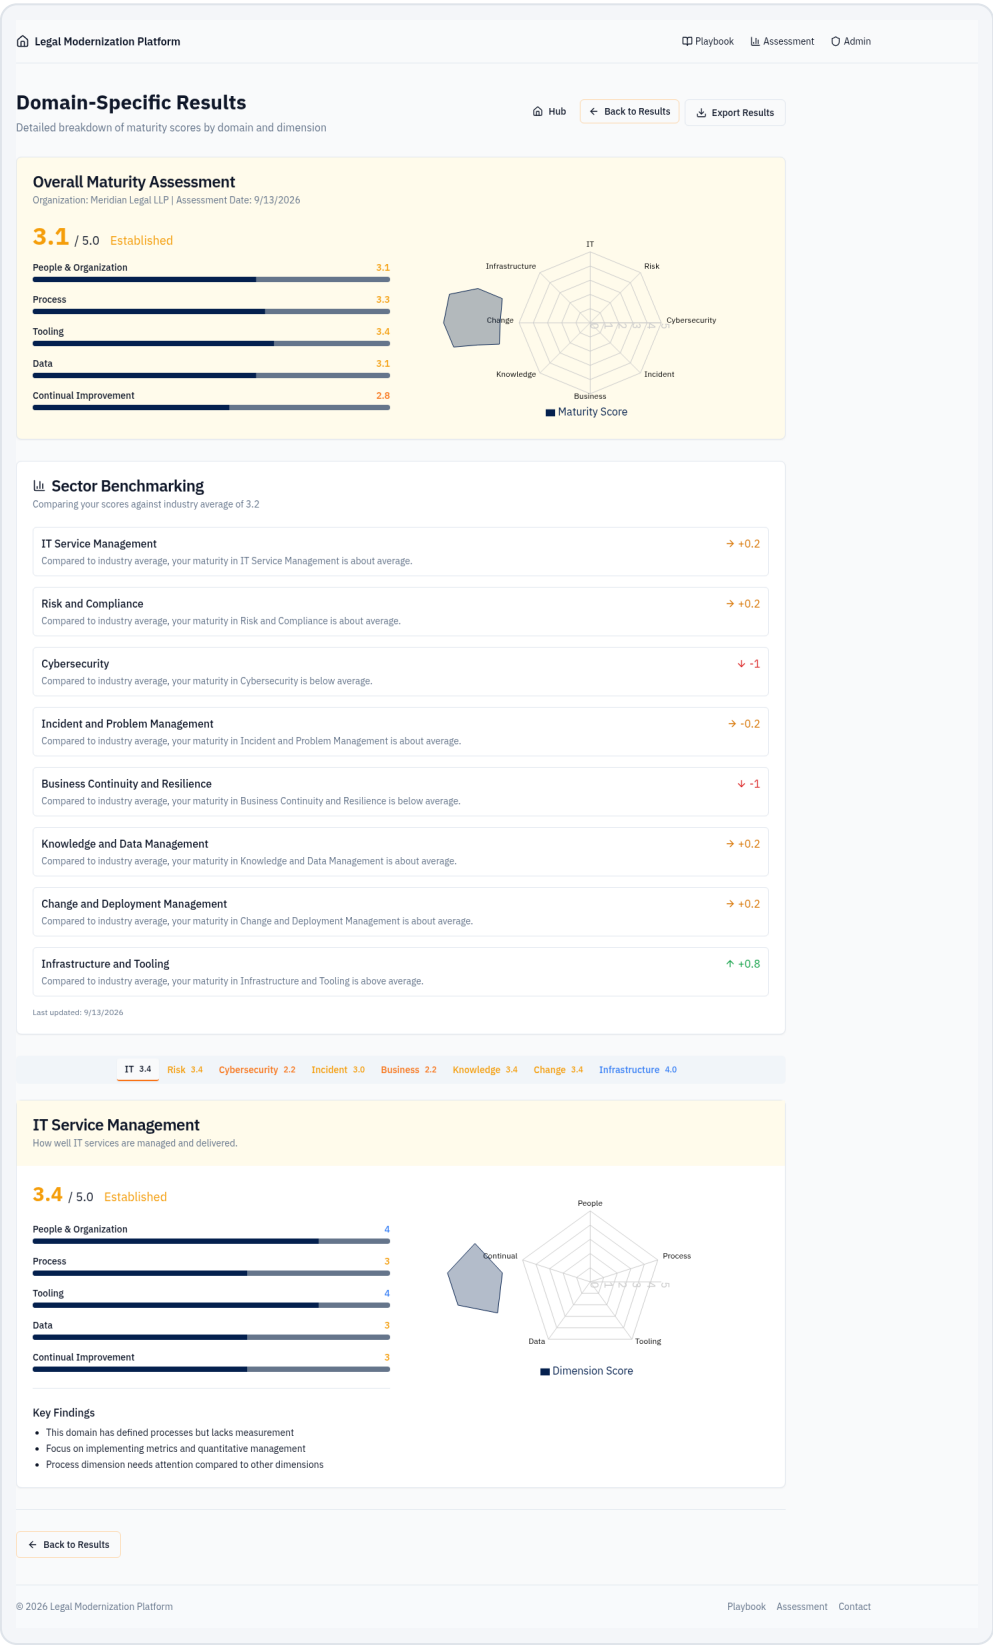

Responses roll up into an overall maturity score, a domain radar overview, strongest/weakest areas, a control-implementation compliance snapshot, and prioritized remediation actions.

The compliance view tracks control implementation progress and maps status across the OMB M-22-09 Zero Trust pillars, translating maturity scores into mandate-aligned readiness.

Scores are benchmarked against a legal-sector industry average, flagging where the organization leads or trails, with per-domain dimension breakdowns and key findings.

COMPLETE ASSESSMENT DETAIL

Domain-by-Domain Results

Every one of the eight assessed domains is shown fully fielded, each with its maturity score and level, all five dimension ratings (People, Process, Tooling, Data, Continual Improvement), a dimension radar profile, and domain-specific key findings.

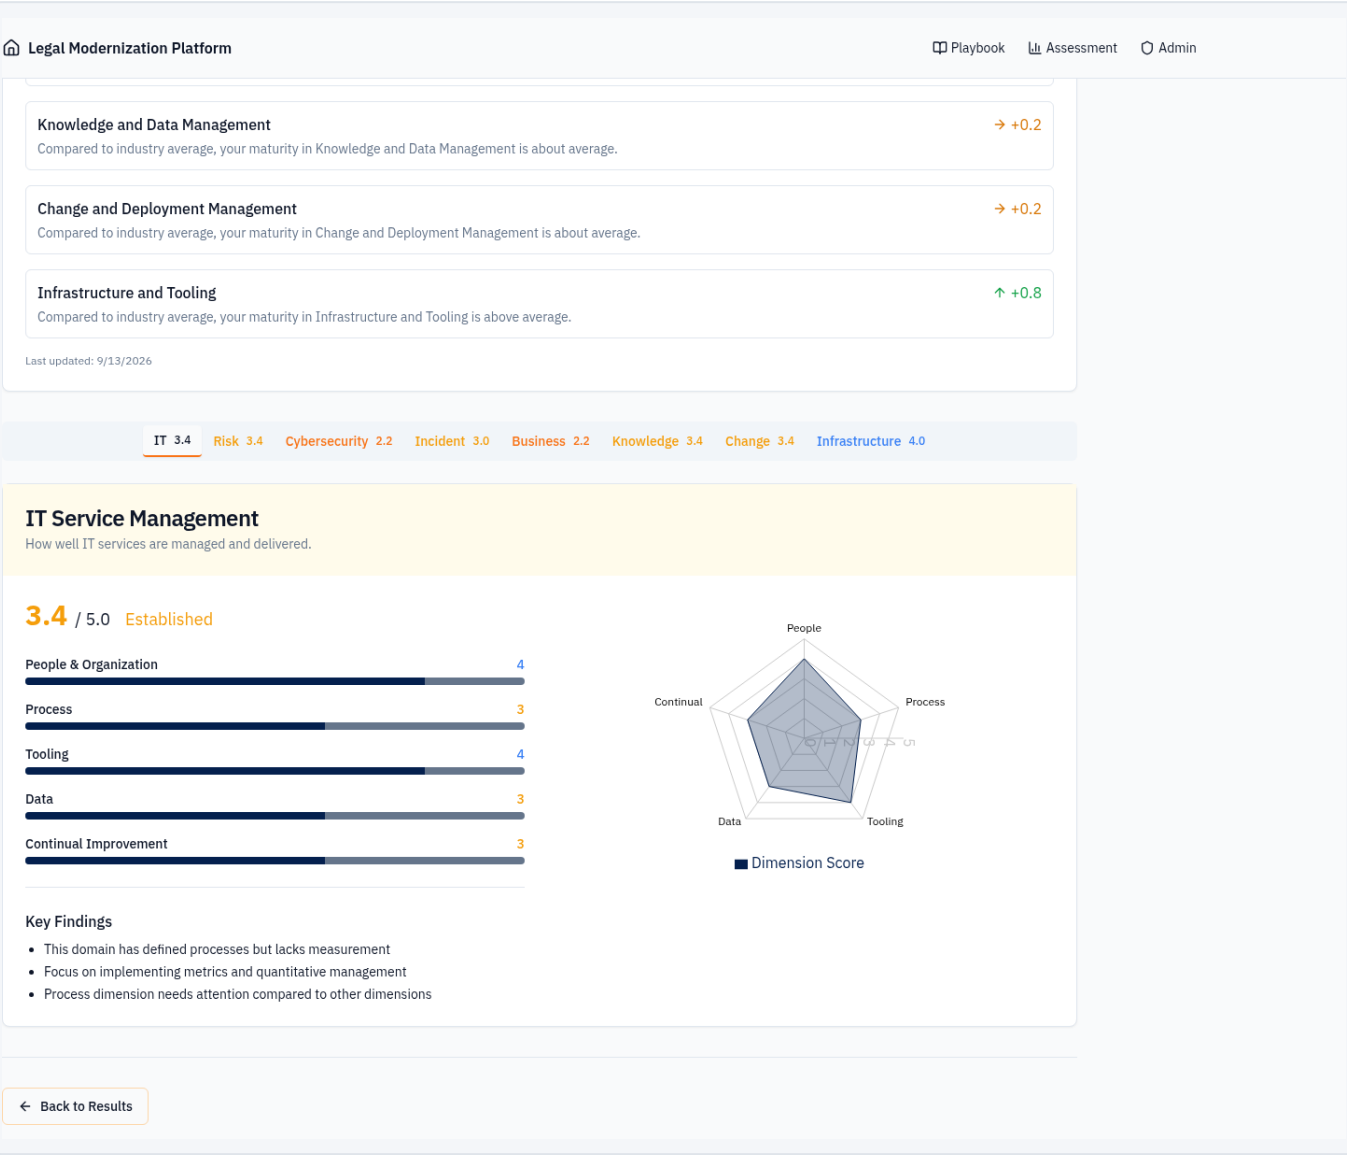

SCORE INDEX

IT Service Management	3.4 / 5.0	Established
Risk and Compliance	3.4 / 5.0	Established
Cybersecurity	2.2 / 5.0	Developing
Incident and Problem Management	3.0 / 5.0	Established
Business Continuity and Resilience	2.2 / 5.0	Developing
Knowledge and Data Management	3.4 / 5.0	Established
Change and Deployment Management	3.4 / 5.0	Established
Infrastructure and Tooling	4.0 / 5.0	Managed

DOMAIN 1 OF 8

IT Service Management

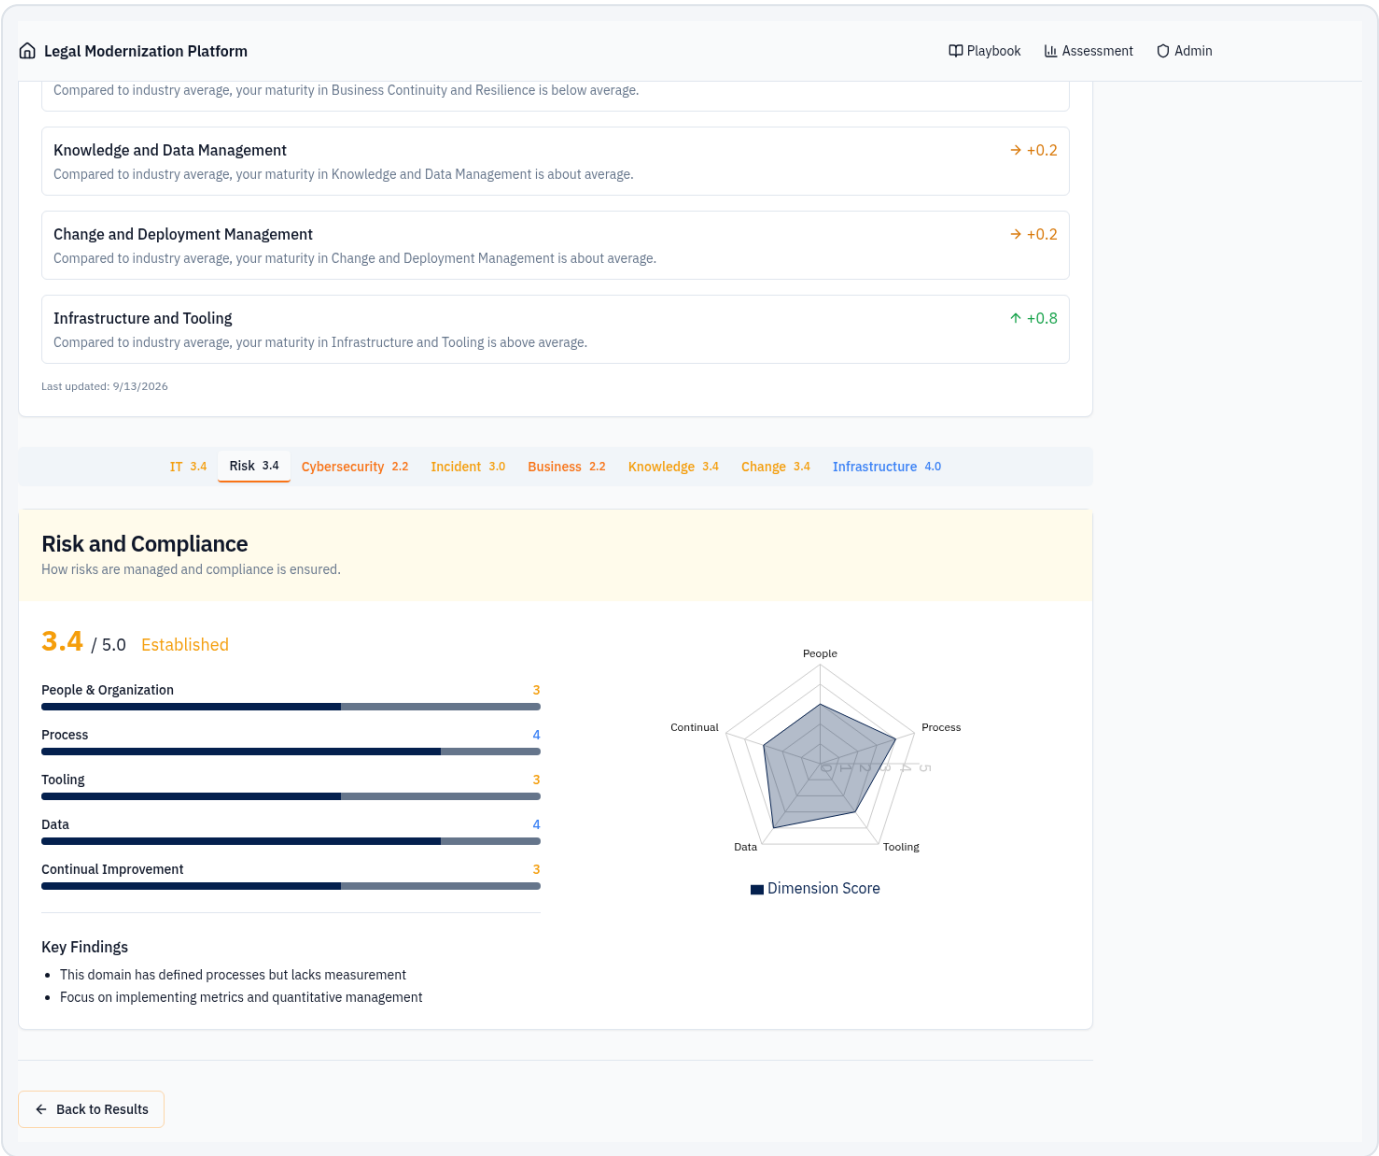

Score 3.4 / 5.0 (Established). Dimension detail: People 4, Process 3, Tooling 4, Data 3, Continual Improvement 3, with radar profile and key findings on where measurement and process rigor are needed.

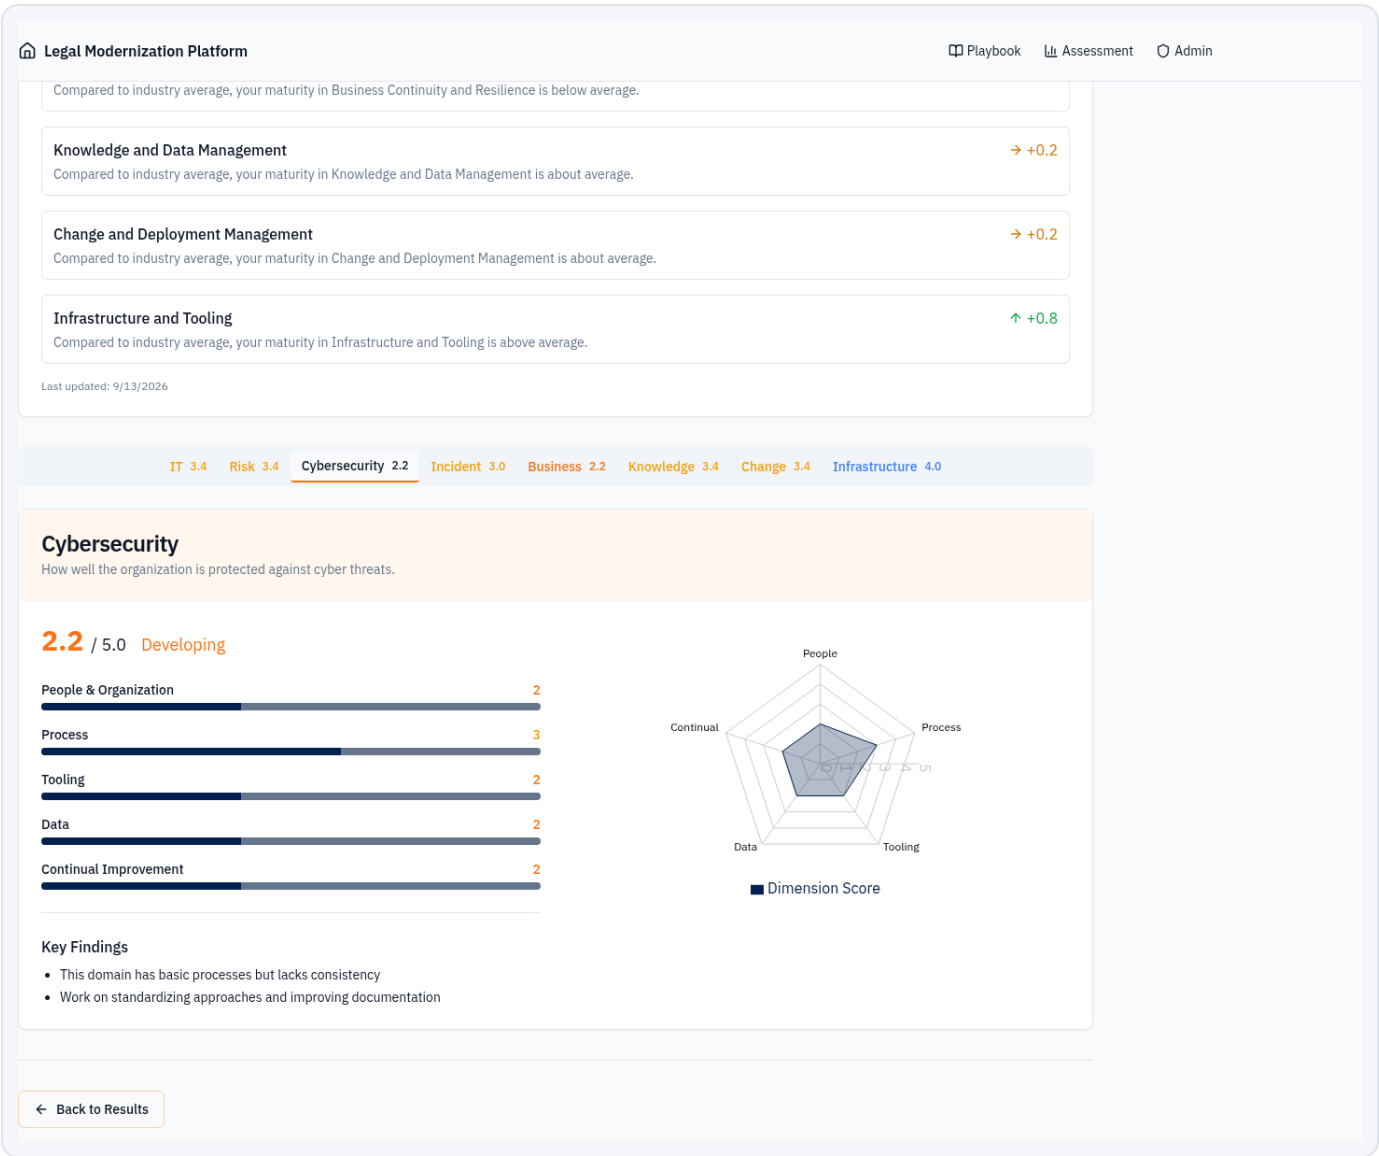

DOMAIN 2 OF 8

Risk and Compliance

Score 3.4 / 5.0 (Established). People 3, Process 4, Tooling 3, Data 4, Continual Improvement 3. Strong process and data governance, with metrics and quantitative management flagged as the next step.

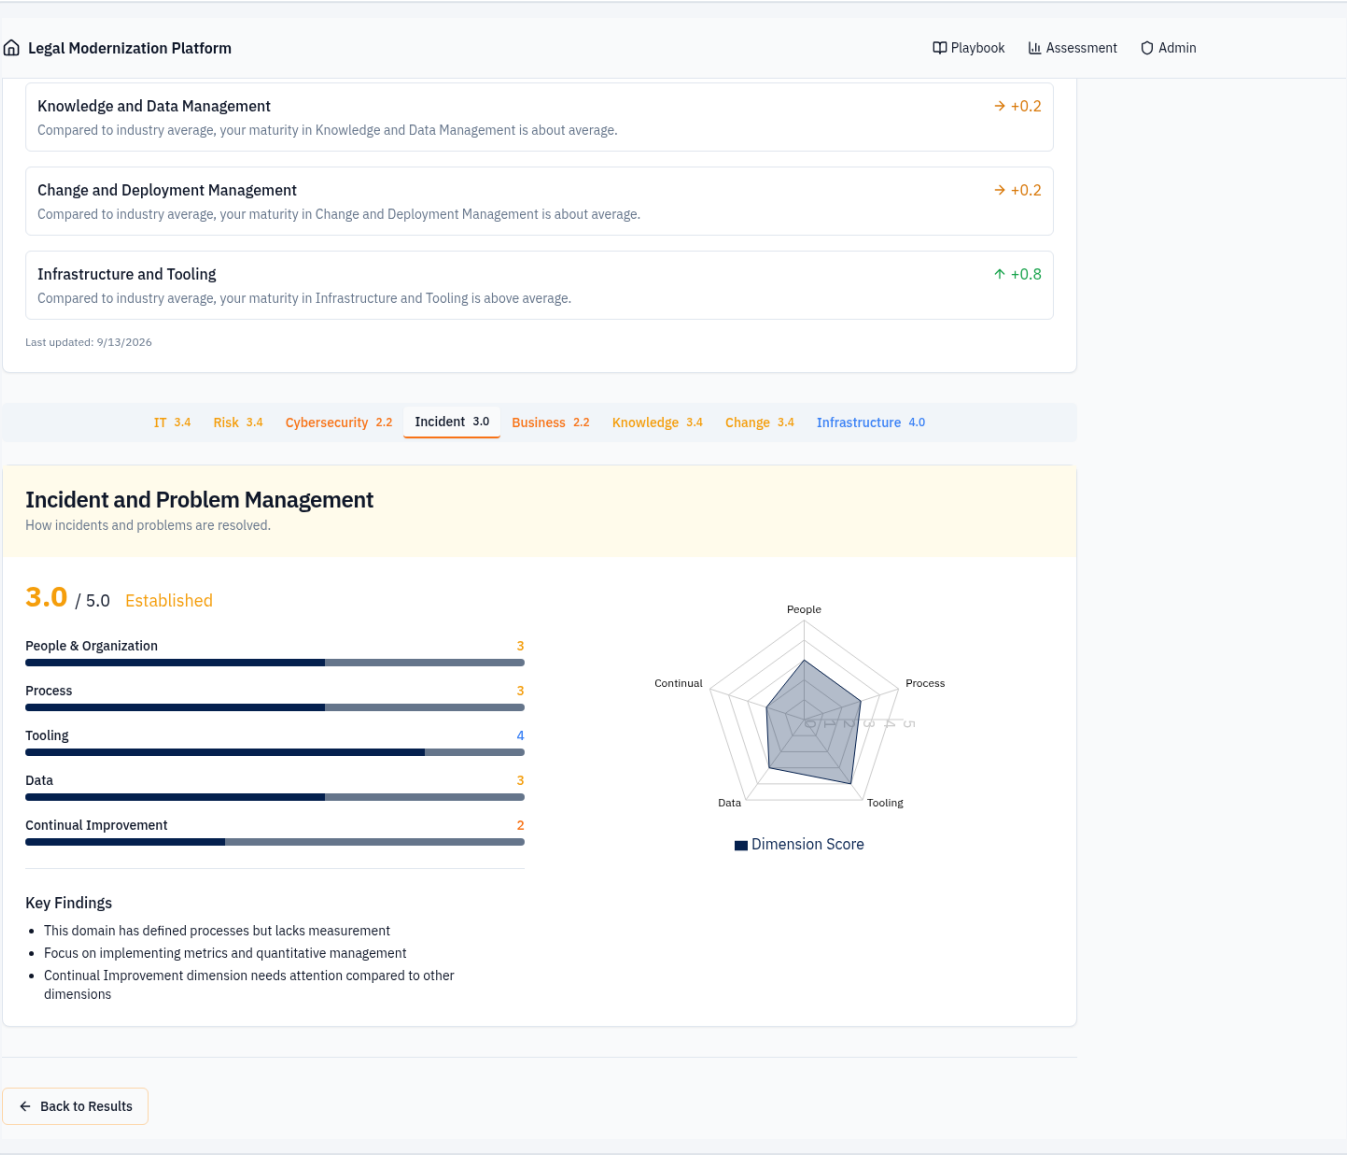

Score 2.2 / 5.0 (Developing). People 2, Process 3, Tooling 2, Data 2, Continual Improvement 2. The lowest-scoring domain. Findings call for standardized approaches and improved documentation.

DOMAIN 4 OF 8

Incident and Problem Management

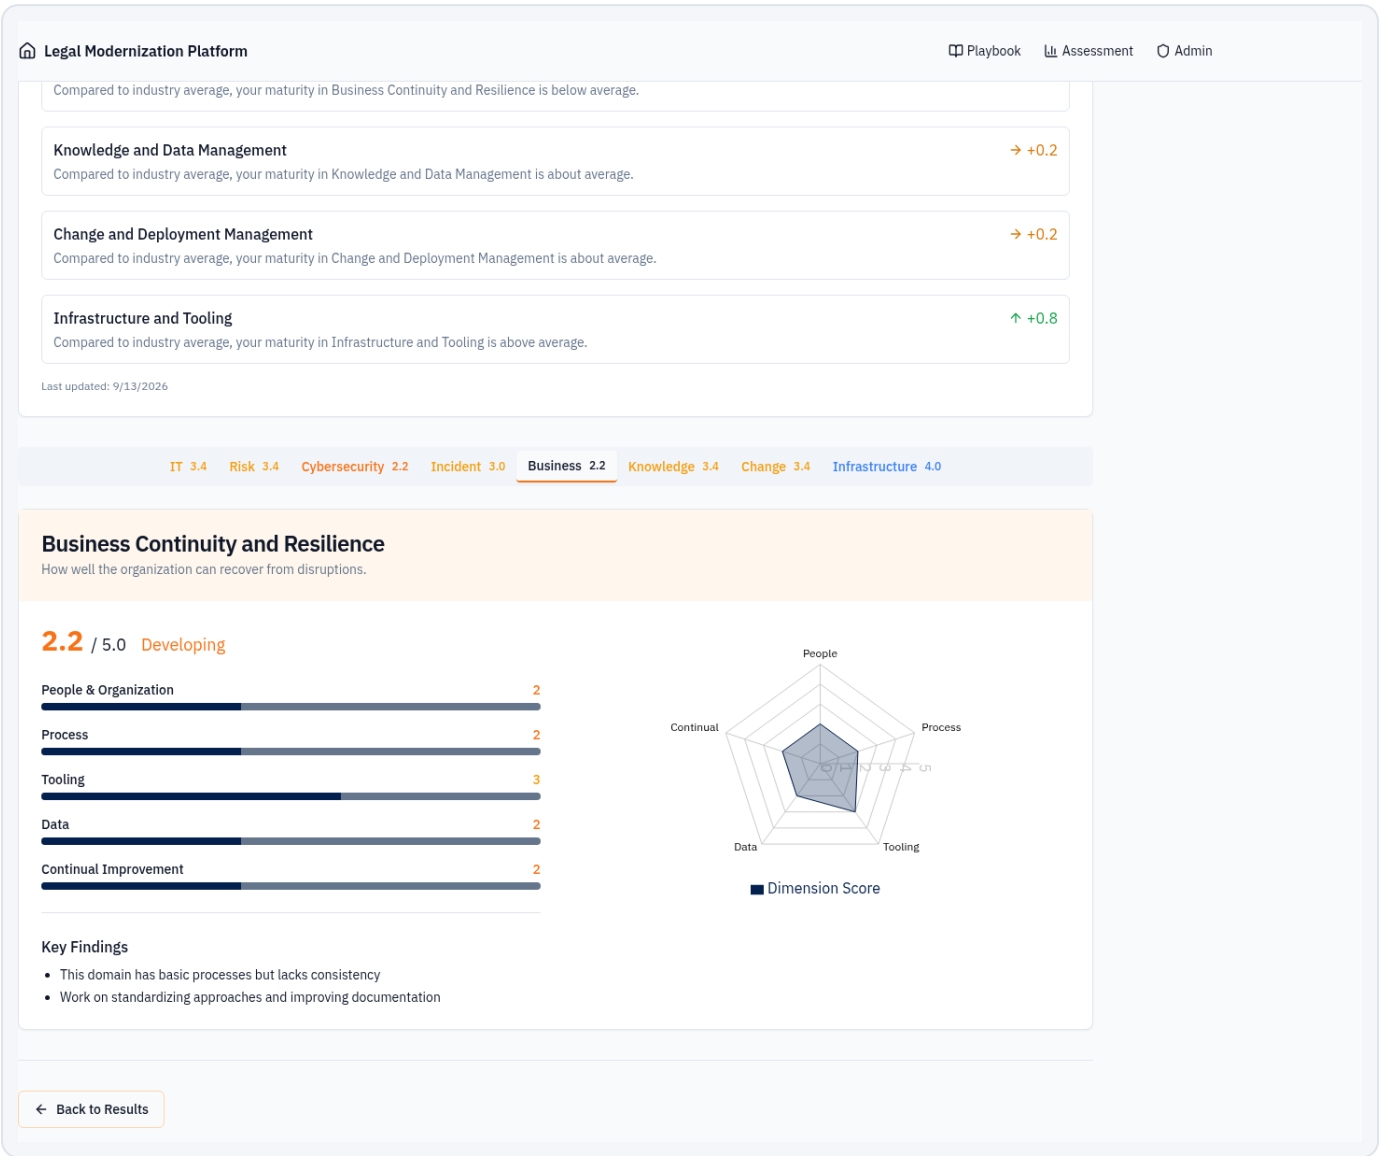

Score 3.0 / 5.0 (Established). People 3, Process 3, Tooling 4, Data 3, Continual Improvement 2. Tooling leads; continual improvement is flagged as the dimension needing attention.

DOMAIN 5 OF 8

Business Continuity and Resilience

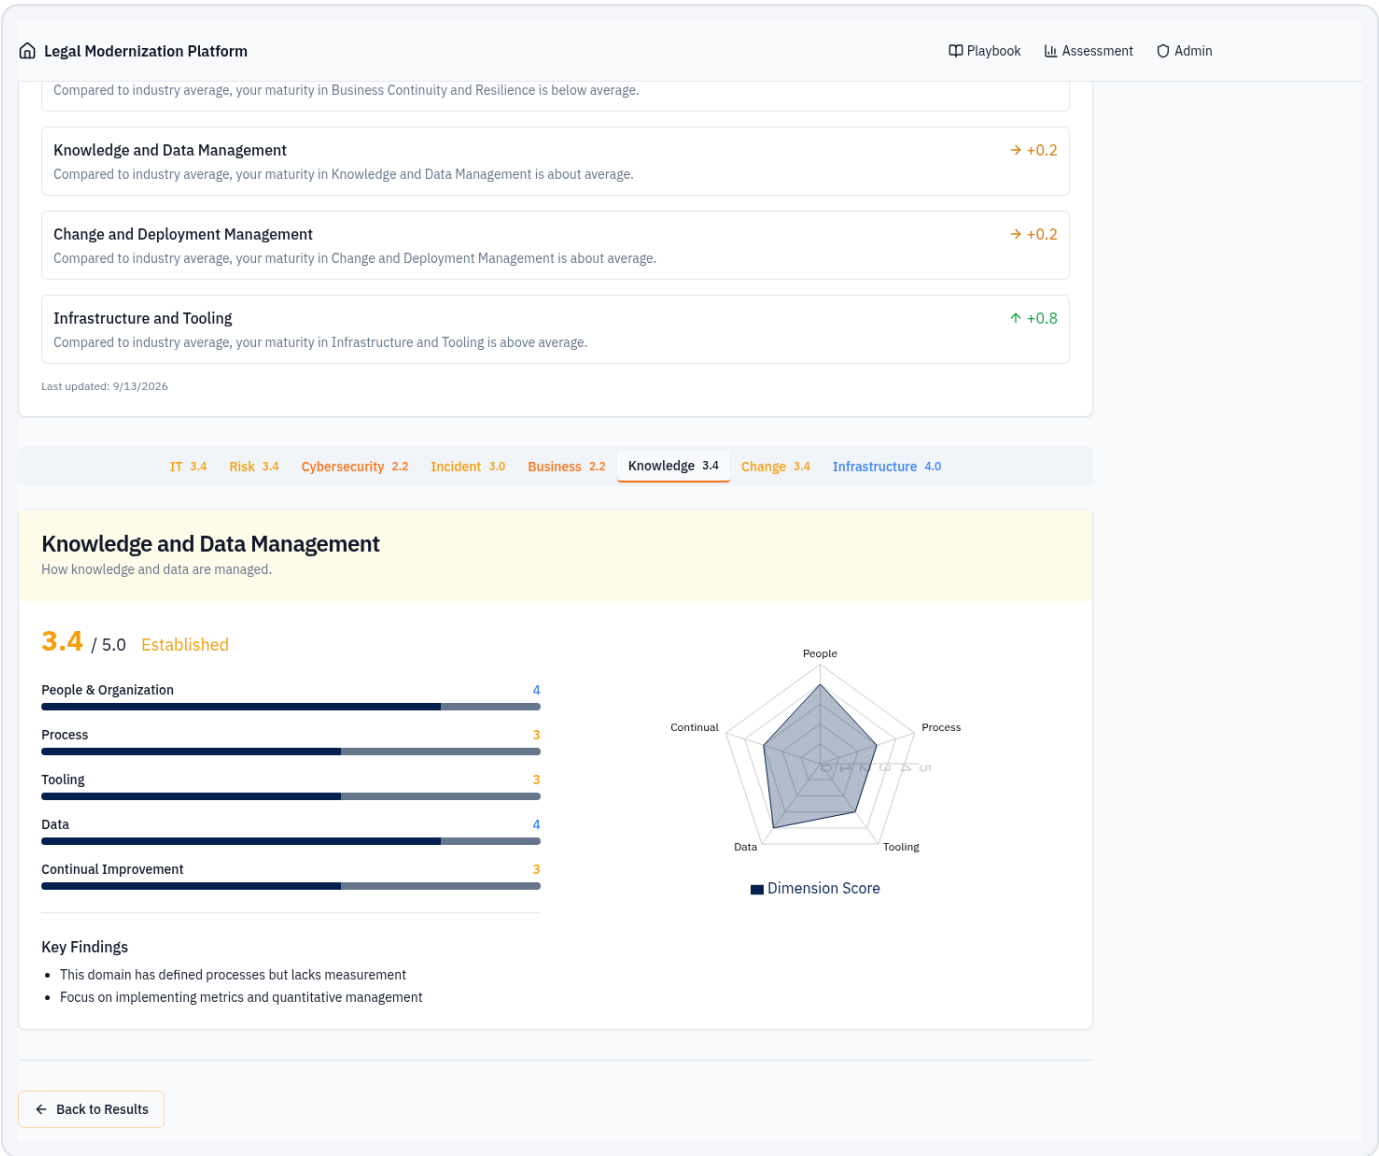

Score 2.2 / 5.0 (Developing). People 2, Process 2, Tooling 3, Data 2, Continual Improvement 2. A priority area. Basic processes exist but lack consistency across the organization.

DOMAIN 6 OF 8

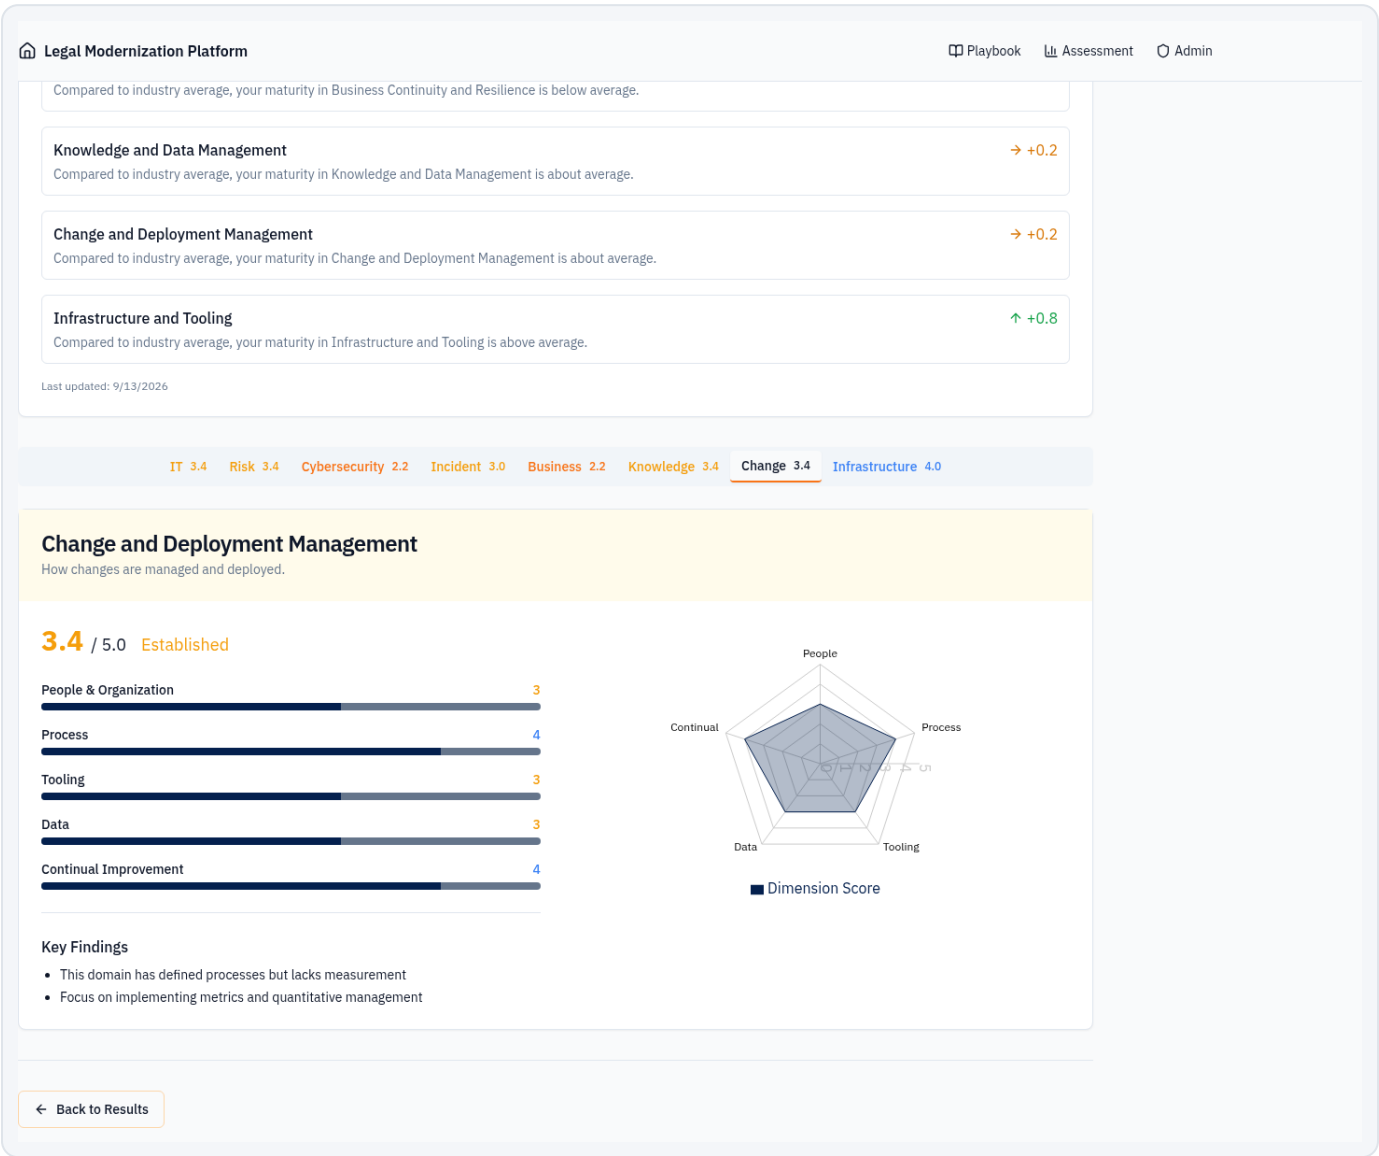

Knowledge and Data Management

Score 3.4 / 5.0 (Established). People 4, Process 3, Tooling 3, Data 4, Continual Improvement 3. Well-defined data practices, with quantitative management as the maturity next step.

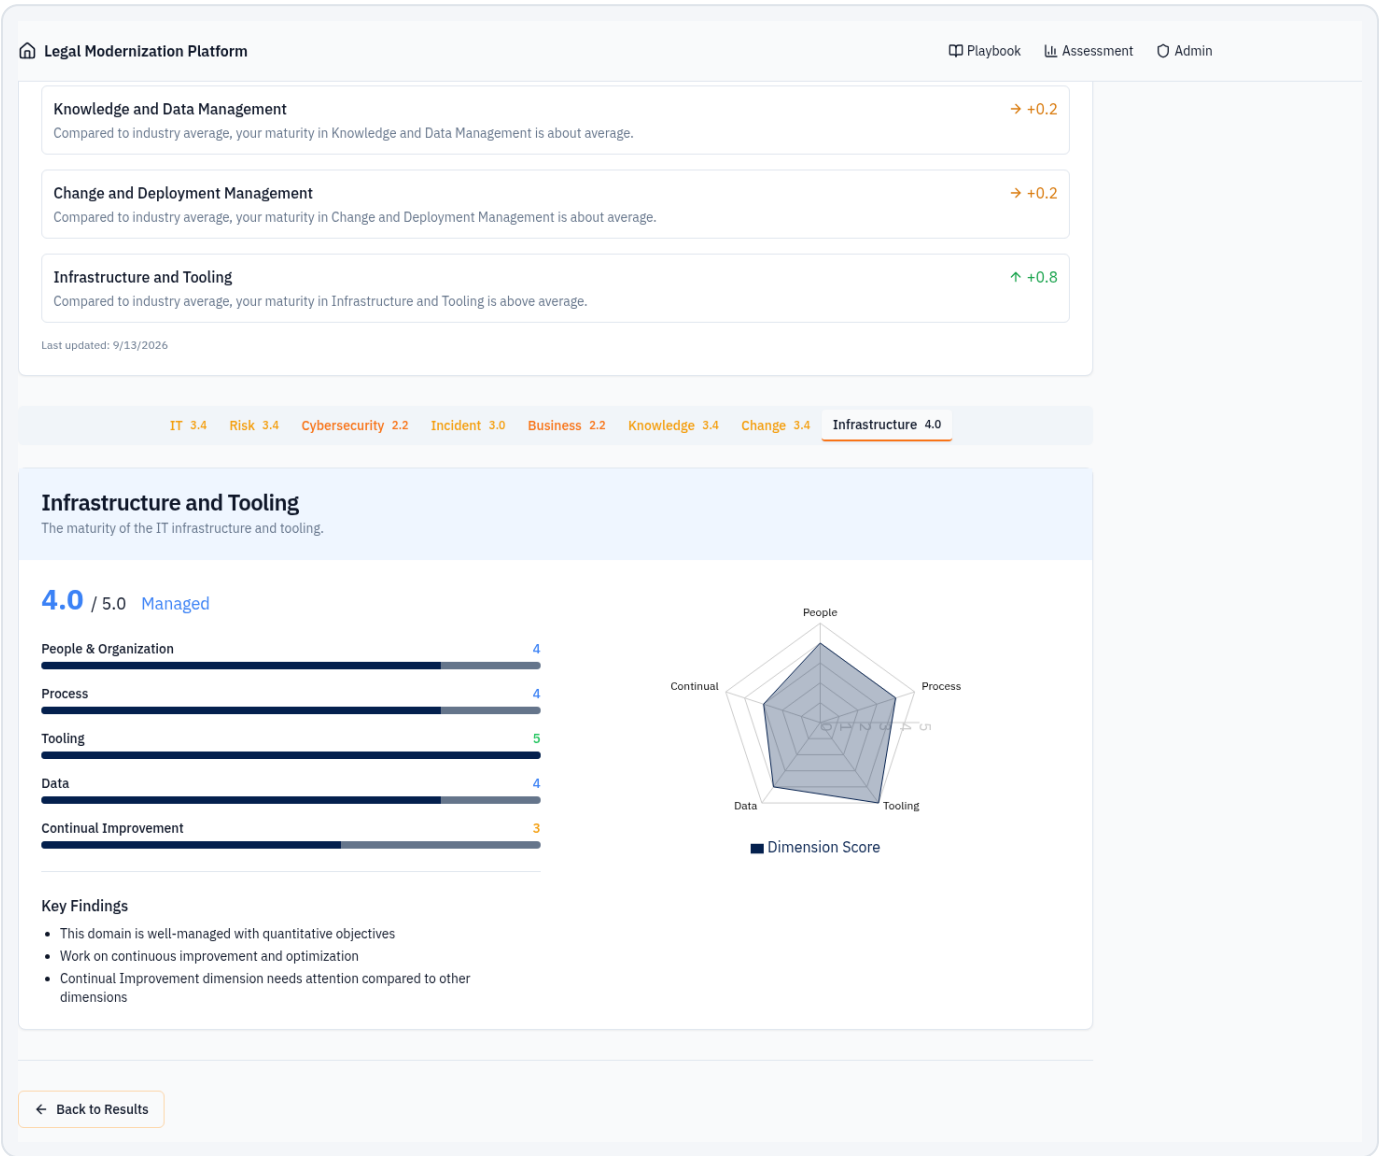

Change and Deployment Management

Score 3.4 / 5.0 (Established). People 3, Process 4, Tooling 3, Data 3, Continual Improvement 4. Mature change process and improvement discipline, with tooling integration to strengthen.

Infrastructure and Tooling

Score 4.0 / 5.0 (Managed). People 4, Process 4, Tooling 5, Data 4, Continual Improvement 3. The strongest domain. It is well managed with quantitative objectives; focus shifts to continuous optimization.

The AI is doing the first review.

This is not a chatbot overlay. Domain-specific agents analyze the assessment signal, compare it with the written operating context, and return reviewable findings for a human assessor.

LIVE REVIEW EXAMPLE

Cybersecurity Agent

Input: maturity profile 2.6 / 5 plus written context about inconsistent tabletop exercises and evidence reviews.

AI finding: material evidence gap

Recommended action: establish a quarterly exercise record with accountable owner, scope, outcomes, and remediation tracking.

FROM INPUT TO DECISION

01

Assessment signal

Scores and written context

02

AI domain review

Risk, action, gap, confidence

03

Human validation

Accept, revise, or reject

ENTERPRISE CONTROL

AI recommendations never change the maturity score, certify compliance, or replace professional judgment. The assessor remains accountable for the final record.

A complete, working system.

From first impression to sector benchmarking, the platform guides legal organizations through a defensible, mandate-aligned cybersecurity maturity assessment from end to end.

BUILT FOR THE LEGAL SECTOR

Executive Order 14028 · OMB M-22-09 · CISA Directives · Zero Trust Architecture
